

Microsoft Certified Partners

Technology is only as effective as the people who implement it. As your organization considers advancing into new territory, it is best to have people at your side who are accustomed to adapting to the increasing flow of technological advances. The professionals at R & D Industries are progressive thinkers with the know-how to integrate the various levels of computer networking technology, benefiting hundreds of clients throughout the region.

Our customers - corporations, schools, government entities, healthcare facilities and various other urban and rural organizations - have come to value our long-term commitment to their technological needs, as well as our unmatched service which goes hand-in-hand with each client that we serve.

The level of our commitment to the application of technology for the betterment of the region's economy is matched by no other.

Integrating
tomorrow's
technology
today

Serving the region for two decades

R & D Industries, Inc., has provided the northwest Iowa region with various technological solutions since 1984. Our Computer Networking Division has since established itself as a premiere provider of high-end network systems. Our team of dedicated professionals has assisted clients with the planning, design and implementation of hundreds of successful projects.

Today, we continue that tradition of success by continually improving and advancing our services in order to best adapt to the technological needs of our clients. We provide customers with various forms of integrated solutions - from security consultation and implementation, to local and wide area network design, wiring, fiber optic cabling, and wireless network solutions - all designed to streamline the operations of any organization.

Network Development & Management

Local and Wide Area Networks (LAN/WAN), Virtual Private Networks (VPN), network monitoring, and long-term service contracts.

Network Security Solutions

Vulnerability assessments, monitoring, firewalls, anti-virus software, anti-Spam technology, AAA implementation, and policy planning.

Document Imaging

Implement local document imaging systems, allowing clients to store, index and retrieve virtual documents both locally and over the Internet.

Server Implementation

Develop and execute the latest in Microsoft Server technologies, with long-term service contracts available.

Technology Planning & Consulting

Short- and long-term planning, including technology asset planning and budgeting, customer interaction strategies, security evaluations, etc.

Web Solutions

Web site hosting and design, and e-commerce site development and consultation.
